

Dr. Ed - Keynote Speaker

Electronic Press Kit

Introduction

User Experience and Ethical Ai Expert, Dr Ed Tse is a professional Speaker and Executive coach with a doctorate in Computer Science and a passion for unlocking the creative potential of change leaders and organizations using the power of Artificial Intelligence in the Metaverse.

Dr Ed founded Ai Parenting to answer the question: what Ai is safe for my children? His high voltage presentations transform screen time from sedation to creation, inspire tech confidence with easily understood first principles, and scales businesses using proven SEO strategies.

Dr Ed's passion and purpose lies at the intersection of technology innovation and compassionate justice. He teaches Ai to prepare change leaders for the future of work in world of automation.

Dr. Ed Tse

Electronic Press Kit

Background

Dr Ed's story of transcending shortcomings in the face of unimaginable circumstances is the greatest example of unlocking creative potential, it got him a PhD in Computer Science!

A video of his User Experience went viral in 2005 when YouTube first started. Since then Dr Ed has experienced every form of online hate on English and Chinese social media. A relentless tenacity for not settling for less, and not taking opinions as the truth led Dr Ed to thrive when technology shifts and to inspire others to overcome what seems impossible today.

By identifying new unique sales propositions in crowded markets, Dr Ed transforms the incomes and the lives of change leaders, families, and organizations. With a fervent belief that trust is non-fungible, data is the new vote, and Ai is the new law, Dr Ed scales businesses by leveraging the creative potential of diversity, equity, and inclusion.

Media Love

"[Dr Ed's] table computer allows the teacher and individual pupils to construct a lesson together." -Rory Cellan-Jones, BBC

"Now if [Dr Ed] could show us a video of a real game of WarCraft on the DiamondTouch and played with skill, I would probably wet my pants."
-Leo Huang, HipTech Blog

"Using Warcraft III, [Dr Ed] is able to use voice and touch to control the game in what appears to be an impressively seamless fashion."
-John Choo, Joystiq

"It changes everything and nothing: it's the same game, just far more controllable and intuitive. The table recognizes what shape the hand is making, so coding it to respond to different positions makes the game incredibly controllable." -Pavel Barter, PC Zone

"Not a bad buy if you're a teacher, or if you're just a parent that wants to seriously one-up that little Leapfrog" -Elaine Chow, Gizmodo

"Here's the first multi-touch, multi-user device for teaching early childhood skills... Most importantly, however? It wasn't created by Microsoft." -John Biggs, Tech Crunch

"Someday people will collaborate and the supporting technology will be invisible." Dave Sims CBC News Calgary.

"Designed such spectacular devices they're being used by NASA the US Military and in Board Rooms around the world... what some of Calgary's most creative minds are up to." -CTV News, Calgary

Media Love

"Word is the military got some demos and is pretty interested in the technology. It's pretty easy to figure out why if you watch the vids"

-Gerry Block, International Gaming News

"[Dr Ed] was able to get WarCraft III running on one of the prototypes and shot a video of the DiamondTouch and a voice recognition system in action."

-Zonk, Slashdot

"Forget 24-inch monitors, get yourself a big table. This, quite literally, is a brief glimpse into the future, showing Edward using his fingers to zoom, pan, rotate and tilt Google Earth as well as issuing voice commands" -Peter Sbarski, The Inquirer

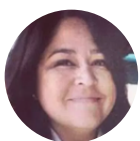

"Expect a Google job offer to be coming, Edward. Expect that tabletop display to be showing up in the Googleplex, which has been woefully lacking in cool stuff for visitors lately." -Danny Sullivan, Search Engine Watch

"This might lift the bar enough for me to shatter my knees limboing under the bar of abject real-time strategy mediocrity." -Florian Eckhardt, Kotaku

"These technologies already exist, they just haven't been brought together, yet. When they are it will be nearly impossible for an undisguised face to go undetected." -National Geographic

"Catholic school students will be the moral voice in a world of tech and science. Dr. Ed brings critical thinking grounded in values." -Alice M., Glendale College and former Catholic School Principal

"Edward has a deep commitment and passion for the challenges of our tech-filled world and focuses on the dire need for our next generation to adapt so they can be successful." -Enoch L., Parent
